

Serial No.: 10/727,053  
Atty. Docket No.: P69207US0

**REMARKS**

The Quayle Action mailed August 3, 2005, has been carefully reviewed and Applicants note with appreciation the identification of allowed subject matter. By this Amendment, claims 1, 6 and 12 have been amended; claims 1-12 are pending.

The Examiner objected to the title as not clearly indicating the invention to which the claims are directed. While Applicants do not entirely understand this requirement, particularly in view of the breadth of the title of related art patents such as U.S. Patent No. 6,700,877 cited by the Examiner, Applicants have herein amended the title. Acceptance thereof is requested.

The Examiner objected to the abstract as being too long. Applicants have amended the abstract to be within 150 words.

The Examiner required the addition of the word "and" at the end of the penultimate clause in each of claims 1, 6 and 12. These claims have been amended herein as required.

As Applicants are not aware of any other informalities requiring correction in the specification and claims, the application is in condition for allowance in accordance with the Examiner's identification of allowed subject matter.
